## THE METHOD OF RIGGED SPACES IN SINGULAR PERTURBATION THEORY OF SELF-ADJOINT OPERATORS (HARDBACK)

Birkhauser, Switzerland, 2016. Hardback. Condition: New. 1st ed. 2016. Language: English. Brand new Book. This monograph presents the newly developed method of rigged Hilbert spaces as a modern approach in singular perturbation theory. A key notion of this approach is the Lax-Berezansky triple of Hilbert spaces embedded one into another, which specifies the well-known Gelfand topological triple. All kinds of singular interactions described by potentials supported on small sets (like the Dirac  $\delta$ -potentials, fractals, singular measures, high degree super-singular expressions)...
